

# FUTURE FOCUSED LEARNING™ ZONES

Learning has evolved... Has your classroom?

## What Are Future Focused Learning™ Zones?

Culture Zones provide a place for students to appreciate and immerse themselves in experiences such as art, music, history and religion. They facilitate a widening of the learners' awareness of the world around them.

Culture Zones can be created by teaming together diverse furniture pieces, including tiered seating for viewing presentations and soft seating combined with vibrant colours to engage and excite.

Create Zones provide the avenue for student expression. Creating can provide purpose and the opportunity to express creativity can affect other key areas of learning.

Create Zones benefit from a diverse range of vibrant coloured furniture that can be mixed and matched. Whiteboard top student tables, ottomans and agile desks combine with smart storage solutions to ensure creative tools are close to hand.

Communication skills are more important than ever, providing the means by which information can be presented. Fostering open discussion and debate in a non-judgemental environment allows communication skills to flourish.

Furniture plays an important role in creating zones where communication can flow freely and effectively. Communicate Zones can be a small intimate space or a large auditorium, often containing a variety of comfortable seating, agile desks and whiteboards.

Connectivity allows students to impact a larger audience and places them in touch with the real world. Providing zones where students can explore and connect effectively and respectfully is vital; whether it is peer-to-peer in the classroom or in an online environment.

Furniture that allows seamless technology integration within the classroom is an essential element of these learning zone. Clever use of tech desks, interactive whiteboards and soft seating will motive and engage.

Student collaboration is an integral part of any Future Focused Learning™ environment. Students learn that collaboration through teamwork broadens perspectives whilst encouraging innovation.

Effective Collaborate Zones benefit from furniture that allows students to engage in discussion, as well as plan and share ideas. Agile desking that allows a variety of group work configurations, and booths combined with meeting tables work well in these areas.

The ability to think critically gives students a means to effectively process and manage information. This life-long skill allows students to solve real world problems and ask 'why?' The ability to filter and analyse are essential future focused skills.

Critical Zones provide space for students to engage in higher order thinking. Soft colours and agile furniture pieces that can be brought together in groups or separated for individual work, facilitate reflective thinking and problem solving activities.
